Enhance your home with a sliding patio door

Improve your home's energy efficiency

Our patio doors are designed to insulate, but they also allow more natural light into your home and give you more options for ventilation. You could find yourself making savings on heating, lighting and air conditioning.

Patio doors add style

Patio doors have clean, uncluttered styling that looks at home almost anywhere. Your furnishings and decor have the perfect neutral backdrop of a door that doesn't need to shout to be effective and that doesn't detract from the view.

Be at home with the outdoors

Because the glass extends to floor level you'll get much better views of the world outside. Even on the chilliest days, you'll be able to enjoy your garden. When it's warm, open up in seconds for a home that flows indoors and out.

Easier access

Our sliding doors glide along their tracks so easily that opening them will never feel like a chore. It's almost effortless, but there's another advantage to a wide opening door. If you've ever struggled to shift a bulky piece of furniture through a normal doorway, you'll know what we mean – that extra width can be a godsend.

Streamlined patio doors

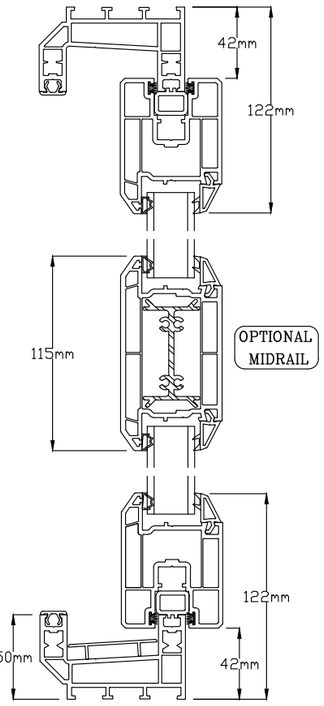

You can hang curtains and have furnishings right next to a sliding door and you won't need to move them when you want to open up.

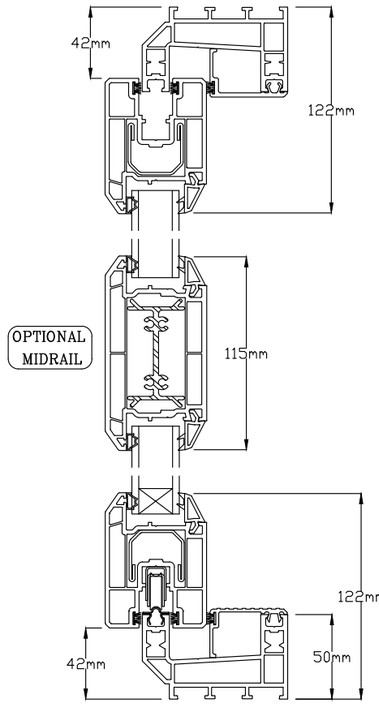

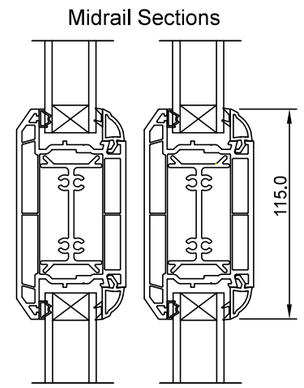

PVC Patio Slider in grey
